The SunStone Pearl Difference

SunStone® Pearl is a truly distinctive pool finish combining the brilliance of the sun with the time-hardened smoothness of one of nature's treasure - the pearl pebble. Available in a spectrum of colors, SunStone Pearl is durable, colorfast, and easy to install and maintain.

Unique Finish

SunStone Pearl is a unique finish that blends delicately small, hand-selected pebble aggregates with fortified white Portland cement. This combination results in a luxurious pool finish that feels as natural as the refined finish of a precious pearl. SunStone Pearl continues to refresh and sooth for years, as it provides the proven durability of pebble finishes with the increased smoothness of smaller pebble aggregates. It is truly one of the most beautiful and time tested surfacing formulas ever created.

- ✓ Unsurpassed Proven Durability
- ✓ Colorful Variegated Aggregates
- ✓ Extremely Etch Resistant
- ✓ Easy to Install and Maintain

Increased Color Radiance

With the use of color-fast ceramic pigments, SunStone Pearl offers what other surfacing materials can't - almost limitless flexibility in poolscape design, making this finish ideal for residential or commercial projects. SunStone Pearl is also one of the industry's easiest finishes to install, adapting to traditional or spayed application methods. SunStone Pearl has become the standard which all other pool finishes are judged.

SunStone Pearl...A Technological Advance in Natural Beauty

Committed to Leading the Industry
