High-Density Colored Aggregate Pool Finish

SunStone Select® delivers a brilliant, color-fast surface with a wonderfully smooth feel. Using the proven SunStone Select formula, vivid colors are created by adding a smaller, rounded, easier to apply and expose color particle. The tighter matrix resulting from this smaller, rounded quartz stone ensures a smoother, more colorful and richer overall pool environment.

Permanent Beauty and Comfort

Rounded, smaller color particles create vivid, unexpected color. The more comfortable, smaller stones create a much smoother surface than competing large-particle aggregate finishes. SunStone Select can be your answer to colored plaster problems. Pigment loss from high oxidizer levels and UV exposure is eliminated by the use of permanently color-coated quartz. Wear-resistance makes SunStone Select a must for heavily used family pools, specialty pools, water-features and commercial installations.

- ✓ **Easy to Install**
- ✓ **Durable Quartz Aggregate**
- ✓ **Wear Resistant**
- ✓ **Custom Colors and Textures**
- ✓ **Easy to Maintain**

SunStone Select's proven, dazzling and brilliant colors are sure to enhance that special poolscape requiring a high-color finish.
